Sponsorship Benefits

★ Brand Recognition and Exposure:

If you are looking to garner brand recognition or to demonstrate your company's technical side, then look no further. Companies love sponsoring (Hack- in -Hub) because we provide exposure to a relevant audience - future customers and early adopters who will try new products and create with new technologies.

★ Recruiting :

Our hackathon grants access to top technical talent from select universities through our rigorous application process. Not only are these students smart and talented, but their passion and drive motivates them to stay up 36 hours to construct a working product. These are the students that you want on your team.

★ Digital Marketing :

In online advertising, sponsorship is where an advertiser pays to have both ads and content on a site. This content could include logos, articles, videos, or anything. In offline marketing, a sponsorship is where an advertiser pays to have its name placed on all materials to do with an event or institution. It is primarily a branding exercise and can be looked at very favourably.

Join. Build. Learn. Tryhard in Hack in Hub '22. Bring-out your hidden tech genius in this 24 hours hackathon by solving difficult problems faced by the folks.

Round 1

Idea Pitching
